Apple iPad Management

iPads are fantastic learning and research devices for students within the classroom, but sometimes configuring, updating and installing apps at a central location, simply takes too long and run after school hours.

Mobile Device Management (MDM) can easily manage your fleet of iPads using Wi-Fi whilst they remain in the classroom without need of collection.

JAMF MDM is specifically designed for cloud based device management use in schools and is specifically designed teachers and IT staff use in mind.

With JAMF School you can set policies, apply profiles, keep track of activities and incidents of all manage Wi-Fi connected devices plus much much more.

Installing apps can be performed on-demand while the iPad is in use.

Webtek Media is an officially licensed reseller of JAMF School MDM software, providing licensing, migration and onsite training for all NSW Department of Education schools.

Ask about your free 30 day trial.

Robotics and Coding

Diversity in modern classrooms has seen teaching principles becoming more progressive with introduction of STEM robotics and coding. Technology advancements has taken learning to the next level, with teaching aids available to create interactive lesson plans.

Using JAMF iPad Management software we can easily manage your fleet of iPad devices, from app deployment and updates to custom wallpapers and screen layouts.

JAMF is listed on Apple's Education page as preferred MDM for schools wanting to take full advantage of all new iOS features!
